

The **Data Summary** provides a listing of data or information sources for the ConnectingOntario ClinicalViewer. The summary is divided into four information types: Acute Care, LHIN Data Summary, Lab and Pathology Results and Dispensed Medications.

**Launching the Data Summary**

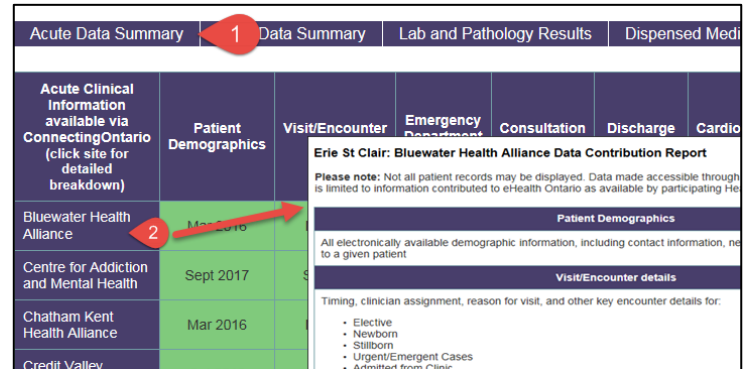

1. Hover the mouse cursor over the  menu icon
2. Select **Data Summary**. The data summary opens in a new browser tab

**Viewing Acute Data Summary**

Visits/Encounters, Documents/Notes, Diagnostic Imaging Reports, and Other Results portlets display acute care information from the provincial Clinical Data Repository (CDR).

1. Click the **Acute Data Summary** tab to display
  - acute care organizations and data types each is contributing to the CDR
  - contribution start dates listed by site and data type
2. Click the **organization's name** to see more details

**Viewing LHIN Data Summary**

The Community portlet displays LHIN home and community care services information contributed to the CDR.

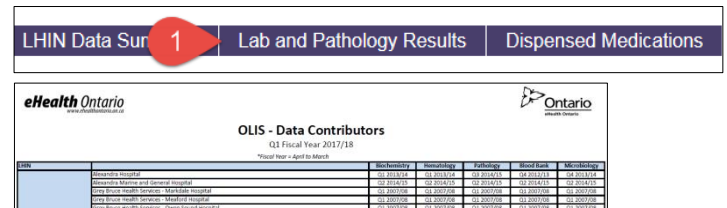

1. Click the **LHIN Data Summary** tab to display
  - LHINs and data types each is contributing to the CDR
  - contribution start dates listed by LHIN and data type

**Viewing Lab and Pathology Results**

The Lab and Pathology Results portlet displays information from the Ontario Laboratories Information System (OLIS).

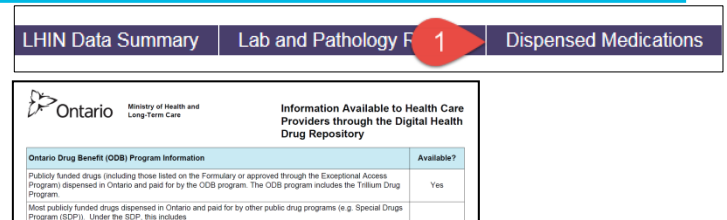

1. Click the **Lab and Pathology Results** tab to access a list of all organizations submitting information to OLIS

**Viewing Dispensed Medications**

The Dispensed Medications tab in the Medications portlet displays information from the Digital Health Drug Repository (DHDR).

1. Click the **Dispensed Medications** tab to access a list of information available in the DHDR

**Exiting the Data Summary**

1. Click the X on the **Data\_summary\_main** tab to close the browser tab
